

FREE OUR HEALTH CARE NOW

We Can Do Better Than This!

— *A Health Care Initiative of the National Center for Policy Analysis* —

Key Project Goals:

- **Alternative:** The NCPA seeks to show politicians, core interest groups, the media and the general public that there is a better alternative to the Affordable Care Act — one that empowers patients, liberates doctors and encourages competition in health care markets.
- **The Message:** To use focus groups and polling to communicate about the alternative with maximum effectiveness.
- **The Consensus:** To ensure that a consensus exists in support of the alternative, even among groups on the right that have been attacking conservative politicians and candidates for office.

New NCPA Book to be released in March 2014

Free Our Health Care Now Projects:

- **Health Care Liberation Act:** This act replaces the Affordable Care Act (ObamaCare). It provides for an orderly transition to an alternative health care system. The transition will take several years.
- **Health Contract with America:** As an alternative to ObamaCare, we pledge to create a health care system based on these principles:
 - Universal coverage.
 - Fair tax relief for health insurance for all citizens.
 - Real insurance for pre-existing conditions.
